Drilling Supervisor

Provide supervision of the day-to-day operations when carrying out drilling, completion, and well testing operations.

Works to provide coordination of all aspects of Well Operations activities to ensure that wells are drilled in a safe, cost effective, and an environmentally responsible manner, adhering to all company core values, corporate fiduciary requisites and policies, and in-country legislation.

Review and optimize drilling programs / procedures in consultation with superintendent to ensure successful and efficient implementation of the drilling program.

Exercise leadership and judgment in dealing with emergencies; and in particular, act as an expert resource in well control situations.

Ensure that equipment and procedures are in place to deal with emergencies and unexpected deviations from the well plan.

Continuously identify ways to reduce costs and improve work program effectiveness without sacrificing quality, production rates, or reserves.

Typically requires at least seven years of experience in the field or related area.

Assignment Manager is looking for a Managed Pressure Drilling Technical Supervisor.

Petrotechnical Resources of Alaska, LLC (PRA) is an Equal Opportunity Employer
