## **HS - Safety - Emergency Response Technician I**

Provides field support of respiratory equipment to include air compressors, air sampling, required testing and maintenance and repair of field emergency response equipment. In addition, this position may also be a member of the Fire, Medical, Rescue, and Spill Response teams.

Provides spill response and environmental management support to the assigned area. Performs safety audits, identify and record hazard analyses of specific jobs. Performs site inspections around the assigned facility to ensure areas are free from all environmental and safety risks. Typically requires up to 3 years of experience. Entry level.

Provides technical and/or administrative support. Demonstrates the ability to learn terminology, applications and standard procedures for performing the job function. Performs routine, basic office/field tasks using established procedures.

We currently estimate this position will be full time through the end of September. After which, it will transition into a fill-in position, so the work schedule will be intermittent. Intern will assist Fire Tech with Annual Hose Testing, MSA Air Pack testing, and other jobs as assigned. Preferred to have, Emergency Response back round.

Also required valid Driver's License. Please see attached Job Description.

**Petrotechnical Resources of Alaska, LLC (PRA) is an Equal Opportunity Employer**
