Mr. Simons has 21 years of experience in the petroleum and production industry focusing primarily on wellsite geology operations. Tom has been involved in oil and gas exploration in the many basins around the Northern U.S. Rockies from Colorado to Wyoming and Montana in addition to North and South Dakota. In the last five years Tom has worked primarily on the North Slope of Alaska, from Kuparuk and Milne Pt. to Prudhoe, and east of Badami. In addition to exploration work, Tom has extensive experience in geo-steering horizontal wells on both big rigs and coiled tubing units on the North Slope.

PROFESSIONAL EXPERIENCE

2/2000 to Present – CONSULTANT, PETROTECHNICAL RESOURCES OF ALASKA

Wellsite Geologist responsible for geo-steering horizontal wells in Prudhoe Bay, Kuparuk and Milne Pt. (BP). In addition, providing cuttings descriptions, petrophysical picks, wireline and MWD logging supervision, and interaction with onsite drilling staff and Anchorage-based Asset personnel.

3/1999 to 2/2000 – INDEPENDENT CONSULTANT, WYOMING

Wellsite Consultlogging (both Geologist and mudlogging) for Brown Operating, WestTech, Carter & Associates, and Dudley & Associates, Powder River, Hanna, and Continental Divide Basins, Wyoming, and Minot, North Dakota. Responsible for all wellsite geologic operations including petrophysical picks, DSTs, wireline logging, coring and reports.

10/1997 to 3/1999 – CONSULTANT, PROFESSIONAL BUSINESS SERVICES, ALASKA

Wellsite Geologist responsible for geo-steering horizontal wells in Prudhoe Bay (BPX-Alaska) in addition to exploration wells (SB-01, SB-02, NW Eileen #1, #2) involving major coring projects. Likewise, responsible for cuttings descriptions, petrophysical picks, wireline and MWD logging supervision, and interaction with onsite drilling staff and Anchorage-based Asset personnel.

8/1996 to 10/1997 – INDEPENDENT CONSULTANT, WYOMING

Wellsite Consultlogging (both Geologist and mudlogging) for Cate Geological Services and Petro-Log Co., Wind River Basin, Wyoming. Responsible for all wellsite geologic operations including petrophysical picks, DSTs, wireline logging and reports.

4/1989 to 8/1996 – PARKS SERVICE, CITY OF CASPER, WY

Computerized water management for Municipality of Casper, WY. AutoCad 13, responsible for maps and plats of all city properties in addition to monitoring all parkland water expenditures.

10/1985 to 2/1989 – CORE ANALYST, CORE LABORATORIES, CASPER, WY

Core analyst and lab safety engineer. Responsible for core analysis and reports in addition to properly disposing of laboratory waste stream.

2/1982 to 10/1985 – INDEPENDENT CONSULTANT, WYOMING

Wellsite consultant for Total Depth Engineering and Sancana, Inc., Powder River Basin, Wyoming. Responsible for wellsite geology operations including cuttings descriptions, logging, petrophysical picks, and reportage.

12/1978 to 2/1982 – TOOKE ENGINEERING CO., CASPER, WY

Wellsite geology including cuttings descriptions, logging, petrophysical picks, coring and reportage, Colorado, Wyoming, South Dakota, and Montana.
